OpenCore

Errata Sheet

[2020.06.19]

1 Introduction

This document provides information on select issues discovered in the relesed versions of OpenCore and provides workarounds whenever possible. This document is updated after OpenCore is released and is thus not contained in the binary packages.

This document contains issues considered causing significant impact on the end-user. More details on all known issues including feature requests and development version issues can be found at Acidanthera Bugtracker.

2 Issue list

- **Identifier**: `ERR059-1`
  Published: 2020-06-02 08:06 MSK
  Updated: 2020-06-16 21:10 MSK
  Affected versions: 0.5.9
  Resolved in: 0.6.0 (9d5aa267)
  Description:

  Boot picker menu may not show when upgrading macOS with the following error:

  ```
  OCUI: Entry kind 16 unsupported for IconOCB: ShowMenu failed - Unsupported
  Halting on critical error
  ```

  Possible workarounds:

  - Add `run-efi-updater` variable with `NO` string value `OR`
  - Avoid using OpenCanopy `OR`
  - Disable showing picker by setting `ShowPicker` to `false` `OR`

- **Identifier**: `ERR059-2`
  Published: 2020-06-02 08:06 MSK
  Updated: 2020-06-16 21:10 MSK
  Affected versions: 0.5.9
  Resolved in: 0.6.0 (670d4e0)
  Description:

  Incorrect operating system may be selected as the default during macOS upgrade when Windows and macOS are installed on the same disk. Reference: acidanthera/bugtracker#948.

  Possible workarounds:

  - Add `run-efi-updater` variable with `NO` string value `OR`
  - Install Windows on a separate disk `OR`
